

CLOUD-NATIVE DEVELOPMENT

We've made it our mission to transition your IT investments that are merely supporting your business, to investments that deliver a cohesive system for acquiring new customers, better retain existing customers, and drive more profitability year over year.

Strategy and Architecture

- ✓ Evaluate your current applications and processes
- ✓ Design your new Cloud Architecture
- ✓ Create your Cloud Migration Strategy

Application Modernization

- ✓ 'Lift & Shift' to the Cloud
- ✓ Re-Platform
- ✓ Component Modernization
- ✓ Replace manual processes with automation

Cloud-Native Application Development

- ✓ Re-architect / Re-write
- ✓ Leverage cloud-native managed services
- ✓ Serverless Architecture
- ✓ Microservices Architecture

Cloud-Native DevOps

- ✓ CI/CD Services
- ✓ Containerization
- ✓ Infrastructure as Code and Automation
- ✓ Automated incident response

How Cloud-Native Development can help your organization:

REDUCE COSTS

INCREASE INNOVATION

IMPROVE RELIABILITY

SPEED TO MARKET

What is Serverless Architecture?

A serverless architecture is a way to build and run applications and services without having to manage infrastructure. Your application still runs on servers, but all the server management is done by AWS. You no longer have to provision, scale, and maintain servers to run your applications, databases, and storage systems.

TRADITIONAL ARCHITECTURE

SERVERLESS
